Please let Rob know and include him on this. It sucks when you are the OSC and not in the loop on things, especially management involvement.

Let me know if you are going to do that, or if you want me to.

Michelle Rogow
On Scene Coordinator
USEPA Region 9

Sorry, hit the wrong button on my phone!

Supervisor Solis is demanding a public meeting for the greater Maywood community to hear about the recent fire. Unified Command is planning it for

Wednesday next week. Because this is a high profile event, and all the heads of the response agencies will be there, AND they all spoke Spanish at our last meeting (the EPA OSC had a translator, as did a fire fighter, though he also spoke Spanish), I thought it would be a good idea for Enrique to visit the response and attend the public meeting at least to introduce himself and be seen by the community.

The City of Maywood has a very contentious relationship with their residents so we are trying to defuse tensions by having an open house to provide a lot of response and assistance information in a more one-on-one format, but we will have a program as well.

Just floating the idea to see what y'all think.

Thanks!

Rusty
